Sergi, 2021-10-06 Social entrepreneurship is one of the most controversial actualities of the modern economy. Comprising a collection of research presented at the International Scientific Conference Advanced Issues on Social Entrepreneurship, this contributed volume offers a global economic analysis of social entrepreneurship. fundamentals of financial management 10th edition: Management Andragogics 2 Albert Stähli, 2005-09-23 At a time when managers often provide fodder for unseemly headlines, and some

are even compared unflatteringly with locusts, today's business leaders are called upon as never before to demonstrate the moral justification for their activities, and to ensure that it is understood by all the key stakeholders of a company. What is required is nothing less than a management renaissance, based on a thoroughgoing concept of corporate leadership; there is no less a need for decision makers who hold themselves to the highest standards, with a positive perception of their function as agents of dissemination, and who are committed to the good not only of "their" firm, but also of society in general. Particularly in today's environment of significant movements of goods, the highest priority is accorded to the social and labor policy elements of company management. For its part, the State must create advantageous framework conditions and promote the willingness to accept risk that is fundamental to the entrepreneurial spirit. A social, constitutional state with a liberal social structure has always been and remains the prime concern of democratically spirited forces everywhere. When managers live up to the expectations with which they are entrusted, they lend the social market economy – often misunderstood and sometimes even misused – a new luster. This in turn fulfils the hopes and expectations of those Europeans for whom the development of pan-European structures stands for the recovery from post-communist stagnation.
