

how many white people in the world

How Many White People in the World: Understanding Demographics and Global Distribution

how many white people in the world is a question that often arises in discussions about population demographics, ethnicity, and global diversity. It's a topic that combines elements of history, migration, genetics, and social identity, making it both fascinating and complex. If you've ever wondered about the size of the white population globally or how it compares to other ethnic groups, this article will guide you through the key facts and figures, shedding light on the subject with clarity and nuance.

Defining "White People": A Complex and Evolving Concept

Before diving into numbers, it's important to understand what is meant by "white people." The term generally refers to individuals of European descent, but definitions can vary depending on cultural, social, and geographic contexts. In the United States and many Western countries, "white" is often classified as a racial category that includes people with origins in Europe, the Middle East, and North Africa. However, in global demographic studies, the classification might be narrower or broader.

Ethnicity and race are not fixed biological categories but social constructs shaped by history and politics. For example, groups considered white in one country might be categorized differently elsewhere. This makes estimating the global number of white people a nuanced task.

How Many White People in the World? Current Estimates

Accurate data on how many white people in the world exist can be challenging to pin down due to varying census methods and definitions worldwide. However, according to demographic studies and global population data:

- The total world population is approximately 8 billion as of 2024.
- People classified as white, primarily of European descent, constitute roughly 11-15% of this total.
- This corresponds to an estimated 880 million to 1.2 billion individuals worldwide.

These figures include populations in Europe, North America, Australia, and parts of Latin America where European ancestry is predominant.

Europe: The Heartland of the White Population

Europe remains the continent with the highest concentration of people identified as white. The population of Europe is around 750 million, and while the continent is ethnically diverse, the majority identify as white. Countries like Germany, France, the United Kingdom, Italy, Spain, and Russia contribute significantly to this number.

Despite some demographic shifts due to migration and lower birth rates in certain regions, Europe continues to be the primary home for white populations globally.

North America and Australia: White Populations in the New World

In North America, particularly in the United States and Canada, white people represent a significant portion of the population. In the U.S., about 60% of the population identifies as non-Hispanic white, which translates to roughly 200 million people. Canada's white population is estimated to be around 72% of its 40 million residents.

Australia is another key region with a predominantly white population, largely descendants of European settlers. Approximately 76% of Australia's 26 million people identify as white.

Latin America: A Diverse Mix Including White Populations

Latin America is often overlooked when discussing white demographics, but it hosts a substantial number of individuals with European heritage, especially in countries like Argentina, Uruguay, and Chile. Argentina, for example, has a population of about 45 million, with estimates suggesting that over 85% have some degree of European ancestry.

The blending of indigenous, African, and European ancestries in Latin America complicates racial classifications, but many people identify as white or of European descent in the region.

Factors Influencing the Global White Population

Several important factors shape the size and distribution of the white population worldwide:

Migration and Diaspora

Historical waves of migration, from European colonization to modern-day movements, have spread white populations across continents. The European diaspora is a major reason why countries outside Europe have large white communities. For instance, the migration of Europeans to the Americas and Australia over the past centuries established significant white populations there.

Birth Rates and Demographic Changes

In many traditionally white-majority countries, birth rates have declined over recent decades, impacting population growth. Meanwhile, immigration trends and increasing multiculturalism are gradually changing the ethnic makeup of these societies.

Intermarriage and Multiracial Identities

As globalization increases, intermarriage between different ethnic groups becomes more common. This leads to more people identifying with multiple racial or ethnic backgrounds, which can affect how white populations are counted in censuses and surveys.

Why Understanding the Number of White People Matters

Discussing how many white people in the world exist is not about ranking or competition but about understanding human diversity and social dynamics. Knowing demographic trends helps in areas such as:

- **Policy Making:** Governments use demographic data to allocate resources, plan social services, and address inequalities.
- **Cultural Awareness:** Appreciating the ethnic composition of societies fosters greater inclusiveness and reduces stereotypes.
- **Historical Insight:** Understanding population changes sheds light on migration patterns, colonization history, and cultural evolution.

Challenges in Measuring Ethnic Populations Globally

One of the biggest hurdles in answering how many white people in the world

there are stems from differing census approaches. Some countries allow self-identification, while others categorize by ancestry or skin color. Additionally:

- Definitions of race and ethnicity can be fluid and subjective.
- Political and social pressures can influence how people report their identity.
- Some countries do not collect racial data at all, making global estimates less precise.

As a result, population figures are often best viewed as approximations rather than exact counts.

Looking Ahead: The Future of White Population Demographics

Demographic trends indicate that the global white population may experience slower growth rates compared to other ethnic groups due to lower fertility rates and aging populations in many Western countries. Conversely, migration could maintain or even increase white populations in some regions.

Meanwhile, increasing diversity and the rise of multiracial identities will continue to challenge traditional racial categories, prompting social scientists and policymakers to rethink how ethnicity is defined and measured.

Exploring how many white people in the world live today invites us to consider broader questions about identity, history, and the interconnectedness of human societies. It's a reminder that behind every statistic are individuals with unique stories, cultures, and experiences contributing to the rich tapestry of our global community.

Frequently Asked Questions

How many white people are there in the world?

There are approximately 1 billion people who identify as white worldwide, primarily concentrated in Europe, North America, and parts of Latin America.

Which regions have the highest populations of white people?

Europe, North America (especially the United States and Canada), and parts of Latin America have the highest populations of white people.

What percentage of the global population is white?

White people make up roughly 12-15% of the global population, depending on definitions and census data.

How is 'white' population defined in demographic studies?

The 'white' population is generally defined by racial or ethnic criteria, often including people of European descent, but definitions can vary by country and context.

Has the number of white people worldwide increased or decreased recently?

The number of white people worldwide has remained relatively stable or grown slowly, with some declines in percentage due to higher growth rates among other populations.

Which country has the largest white population?

The United States has the largest white population by number, followed by countries like Russia, Germany, and Brazil.

Are white populations growing faster or slower compared to other ethnic groups?

White populations are generally growing slower compared to other ethnic groups, especially in countries with lower birth rates and higher aging populations.

How do migration patterns affect the white population globally?

Migration patterns, including immigration and emigration, influence the distribution and size of white populations, contributing to demographic changes in various countries.

Is the concept of 'white people' consistent across different countries?

No, the concept and classification of 'white people' can vary significantly between countries due to cultural, historical, and social factors.

****How Many White People in the World: An Analytical Review****

how many white people in the world is a question that often arises in demographic studies, social research, and cultural analyses. Understanding the global distribution of populations categorized as "white" involves navigating complexities related to ethnicity, race, self-identification, and historical contexts. This article aims to provide a thorough and nuanced exploration of the number of white people worldwide, drawing on available data sources, demographic trends, and the implications of such classifications.

Defining "White People" in a Global Context

One of the primary challenges in estimating how many white people in the world exist is the lack of a universally accepted definition of "white." The concept varies significantly depending on geographic, social, and political contexts.

In many Western countries, "white" typically refers to people of European descent. However, even within Europe, the classification can be fluid, as notions of ethnicity and race overlap with nationality and culture. In countries like the United States, census categories include "White" as a racial group, generally encompassing European, Middle Eastern, and North African ancestry. Conversely, some countries in Latin America and Africa may use different criteria or avoid racial categorization altogether.

Ethnic and Racial Classifications

The term "white" can encompass a broad range of ethnic groups, including but not limited to:

- Western Europeans (e.g., British, French, German, Italian)
- Eastern Europeans (e.g., Polish, Russian, Ukrainian)
- Mediterranean populations (e.g., Greek, Spanish, Portuguese)
- Middle Eastern and North African groups (sometimes included in "white" depending on classification systems)

Certain countries classify populations based on self-identification, while others use more rigid criteria such as ancestry or skin color. This

inconsistency complicates efforts to determine a precise global number.

Current Estimates of the White Population Worldwide

According to the United Nations and various demographic research institutions, the global population exceeds 8 billion people as of 2024. Estimations of how many white people in the world number vary but typically range between 800 million and 1 billion individuals, representing roughly 10-12% of the global population.

Population Distribution by Region

Europe remains the primary continent with the highest concentration of white populations, with approximately 750 million inhabitants. Almost all European countries have predominantly white populations, though ethnic minorities are also present.

North America, particularly the United States and Canada, houses significant white populations as well. The United States Census Bureau reports that about 61% of the U.S. population identifies as white alone (not Hispanic or Latino), equating to roughly 200 million people. Canada's white population is similarly substantial, comprising around 72% of the total population, or approximately 28 million individuals.

In Latin America, white populations are notable in countries such as Argentina, Uruguay, and Chile. These countries have large populations of European descent due to historical immigration patterns, particularly from Spain and Italy. However, in many Latin American countries, racial identity is less rigidly defined, and many people identify as mestizo or mixed race.

Australia and New Zealand also have predominantly white populations, with European-descended settlers constituting the majority. Australia's white population is estimated at over 18 million, while New Zealand's is approximately 3 million.

Migration and Diaspora Effects

Global migration patterns have influenced the distribution of white populations worldwide. Diaspora communities exist in regions such as South Africa, where white South Africans, primarily of Dutch, British, and other European descent, account for about 8% of the population. Similarly, white populations are present in parts of the Middle East and North Africa due to historical migrations and colonial legacies.

Challenges in Counting White Populations

Several factors impede precise quantification of how many white people in the world there are:

Subjectivity of Racial Identity

Racial identity is highly subjective and influenced by social, cultural, and political factors. Individuals may self-identify differently in censuses or surveys depending on contemporary social attitudes or personal preferences.

Mixed Heritage and Increasing Diversity

Interracial marriages and multicultural societies contribute to increasing numbers of people with mixed heritage, complicating binary racial classifications. In countries like the United States, a growing segment of the population identifies as multiracial, which affects the white population's statistical representation.

Variability in National Census Categories

Not all countries collect data on race or ethnicity. Some, like France, avoid racial categorization based on legal and cultural principles, making it difficult to assess demographic breakdowns.

Implications of Understanding White Population Numbers

Accurately estimating how many white people in the world exist is not merely an academic exercise; it has significant implications for social policy, political discourse, and cultural studies.

Social and Political Relevance

In multicultural societies, understanding demographic compositions helps in crafting inclusive policies, addressing inequalities, and fostering social cohesion. Additionally, population data influence political representation and resource allocation.

Economic and Cultural Impact

Demographic trends, including shifts in white populations, affect economic markets, cultural industries, and migration policies. For instance, aging populations in Europe and North America prompt discussions about immigration and workforce sustainability.

Conclusion

While the question of how many white people in the world there are does not have a definitive answer due to definitional, methodological, and social complexities, current estimates place the number between 800 million and 1 billion individuals globally. Predominantly concentrated in Europe, North America, and parts of Oceania, white populations continue to evolve alongside global demographic trends. Understanding these numbers requires a nuanced approach that considers the fluidity of racial identity and the diverse contexts in which these populations live.

how many white people in the world: *The Everyday Language of White Racism* Jane H. Hill, 2011-09-15 In *The Everyday Language of White Racism*, Jane H. Hill provides an incisive analysis of everyday language to reveal the underlying racist stereotypes that continue to circulate in American culture. provides a detailed background on the theory of race and racism reveals how racializing discourse—talk and text that produces and reproduces ideas about races and assigns people to them—facilitates a victim-blaming logic integrates a broad and interdisciplinary range of literature from sociology, social psychology, justice studies, critical legal studies, philosophy, literature, and other disciplines that have studied racism, as well as material from anthropology and sociolinguistics Part of the Blackwell Studies in Discourse and Culture Series

how many white people in the world: *Racism: a Global Problem* Joseph Godson Amamoo, 2016-04-30 The author has been fascinated by the problem of racism from the time he first encountered it in September 1957 when he arrived in the United Kingdom. And over the period of 60 years of adulthood he has tried to understand the causes of this dangerous ideology. Are People born racist or is it an acquired characteristic? Why did Europe become associated with racism? What are the effects, economic, political and psychological on both the racists and their victims? Can racism be eradicated? Why arent white women racist or insignificantly so compared with men? These are a few of the questions and issues about racism which have interested the author for many years. It is hoped that the reader would not only find this book interesting but he/she would make a contribution however modest toward the elimination of this global problem which has brought immense calamity to the world.

how many white people in the world: *How Choctaws Invented Civilization and why Choctaws Will Conquer the World* D. L. Birchfield, 2007 Will poisoned Indians conquer the United States in the twenty-first century? Is there anything that can be done to stop them? Can the United States's oldest and most loyal Indian military ally, the Choctaws, stop them? Or do Choctaws pose the most difficult problem of all? In this provocative and incendiary book, D. L. Birchfield

bluntly points out what few are willing to say: America's population superiority is now meaningless; its population density is a crippling liability; and the United States has a dangerous Indian problem. If you don't know about the American betrayal of the Choctaws, or whether Choctaws are still loyal to the United States, or why the third largest Indian nation in North America is virtually unknown to Americans, sit back and hold on as Birchfield pulls back the curtain to reveal a startling future, with an irreverence and disdain for convention that is anything but subtle.

how many white people in the world: *White Racism* Joe R. Feagin, Hernan Vera, Pinar Batur, 2020-07-24 This book incorporates a range of new material on racist events and incidents across the United States. It includes a few new concepts and some of the original concepts about individual and institutionalized racism in the United States.

how many white people in the world: *Racism in the United States, Second Edition* Joshua L. Miller, Ann Marie Garran, 2017-01-25 This comprehensive text thoroughly reviews the theories and history of racism, the sociology of and the psychology of racism, intergroup relations and intergroup conflict, and how racism is manifested institutionally, between groups, and between people, providing a unique view of the connections between these multiple perspectives. Readers can then apply this knowledge to their work as helping professionals. Students learn to explore their own biases and how they influence their view of themselves and others, which strengthens their work with future clients. Fulfilling NASW and CSWE cultural competency requirements, this book teaches socially just practices to helping professionals from any discipline. Many people want to dismantle racism but they do not know how. This book gets us closer to that goal. Using critical race theory as a conceptual framework, the text analyzes all levels of racism: personal, professional, institutional, and cultural. Integrating theory, research, and practice, racism is linked to other forms of oppression with an emphasis on how helping professionals can respond. Tips on how to facilitate racial dialogues are provided. Early chapters map out the contours of racism and later chapters emphasize how to dismantle it. Readers appreciate the book's sensitive approach to this difficult topic. Examples and exercises encourage insight into understanding racism, and insightful analyses offer strategies, solutions, and hope. Readers learn to respond to racism in all contexts including working with individuals, families, groups, organizations, and communities. NEW TO THE SECOND EDITION: Reflects recent sociopolitical changes including Islamophobia the Obama presidency, the murders of young men of color by police, the racialization of the criminal justice system, and current immigration issues. More cases and experiential exercises help readers explore how racism is manifested and how to incorporate the lessons learned into future working environments. More emphasis on the intersectionality of racism and other social oppressions including class, gender, sexual orientation, citizenship, immigration experiences, and disability to give readers a better understanding of the relationship between these issues. PowerPoints and Instructor's resources with sample syllabi, teaching tips, and suggested videos and related websites. An ideal text for advanced courses on racism, oppression, diversity, prejudice and discrimination, or racism and professional practice, this book also appeals to helping professionals (social workers, psychologists, counselors, and nurses) who need to understand racism to better serve their clients.

how many white people in the world: *The World's Fastest Man* Michael Kranish, 2021-06-29 In the tradition of *The Boys in the Boat* and *Seabiscuit*, a fascinating portrait of a groundbreaking but forgotten figure--the remarkable Major Taylor, the black man who broke racial barriers by becoming the world's fastest and most famous bicyclist at the height of the Jim Crow era--

how many white people in the world: *The Crisis* , 1933-01 *The Crisis*, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, *The Crisis* has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

how many white people in the world: Rebuilding Community Solidarity and Pluralism

Donald G. Reid, 2024-06-03 This book critiques the traditional practice of community organization, change and development, and concludes that the present practice of Community Development (CD) and Social Policy and Planning (SP&P) is no longer capable of meeting the current challenges at the local or national level. The aim of this book is to identify the underlying motivations for the individual aggressive and collective antisocial behaviour that we witness in democratic society today and offer changes to the orientation of the current community change practice in order to build a system that can better address the present needs of society. This work identifies the factors that are moving society toward extremism and authoritarianism focusing particularly on the community level. Given the turmoil in communities that is degrading democracy and leading to authoritarianism today, the issues of Community Solidarity and Pluralism (CS&P) must be attended to before the traditional political, economic, and material issues that are regularly addressed by CD and SP&P practice can become the focus for change and development once again. This book will have widespread appeal to academics, researchers, and postgraduate students throughout the social sciences including sociology, social work, political science, economics, philosophy, environmental studies, and international and community development studies. It is also intended for the general reader who is interested in understanding the authoritarian forces that are attempting to infiltrate the democratic process.

how many white people in the world: Biracial Britain

Remi Adekoya, 2021-01-28 'Barack Obama had a special talent for making different kinds of people feel comfortable around him because of his biracial life experience, says Adekoya. By the same token, Adekoya himself seems poised to become one of the most important and subtle new voices in Britain's never-ending conversation about race' David Goodhart, Unherd Mixed-race is the fastest-growing minority group in Britain. By the end of the century roughly one in three of the population will be mixed-race, with this figure rising to 75 per cent by 2150. Mixed-race is, quite literally, the future. Paradoxically, however, this unprecedented interracial mixing is happening in a world that is becoming more and more racially polarized. Race continues to be discussed in a binary fashion: black or white, we and they, us and them. Mixed-race is not treated as a unique identity, but rather as an offshoot of other more familiar identities - remnants of the twentieth century 'one-drop' rule ('if you're not white, you're black') alarmingly prevail. Therefore, where does a mixed-race person fit? Stuck in the middle of these conflicts are individuals trying to survive and thrive. It is high time we developed a new understanding of mixed-race identity better suited to our century. Remi Adekoya (the son of a Nigerian father and a Polish mother, now living in Britain) has come to the conclusion that while academic theories can tell us a lot about how identities are socially constructed, they are woeful at explaining how identities are felt. He has spoken to mixed-race Britons of all ages and racial configurations to present a thoughtful and nuanced picture of what it truly means to be mixed-race in Britain today. A valuable new addition to discussions on race, *Biracial Britain* is a search for identity, a story about life that makes sense to us. An identity is a story. These are our stories.

how many white people in the world: Racism and Discourse in Latin America

Teun A. Van Dijk, 2009-10-26 *Racism and Discourse in Latin America* investigates how public discourse is involved in the daily reproduction of racism in Latin America. The essays examine political discourse, mass media discourse, textbooks and other forms of text, and talk by the white symbolic elites, looking at the ways these discourses express and confirm prejudices against indigenous people and against people from African descent. The essays show that ethnic and racial inequality in Latin America continue to exacerbate the chasm between the rich and the poor, despite formal progress in the rights of minorities during the last decades. Teun A. van Dijk brings together a multidisciplinary team of linguists and social scientists from eight Latin American countries (Mexico, Guatemala, Colombia, Venezuela, Brazil, Argentina, Chile, and Peru), creating the first work in English that provides comprehensive insight into discursive racism across Latin America.

how many white people in the world: Modern Black Nationalism

William L. Van Deburg, 1997 In *Modern Black Nationalism*, William L. Van Deburg has collected the most influential

speeches, pamphlets, and articles that trace the development of black nationalism in the twentieth century. This documentary anthology seeks to chart a course between hazardous pedagogical alternatives - neither ignoring nor overstating the case for any one of the various manifestations of black nationalism. Modern Black Nationalism begins with Marcus Garvey, the acknowledged father of the twentieth-century movement, and showcases the work of more than forty prominent thinkers including Louis Farrakhan, Elijah Muhammad, Maulana Karenga, the founder of Kwanzaa, Amiri Baraka, and Molefi Asante. Rare pamphlets distributed by organizations such as the Black Panther Party, articles from underground magazines, and memos from governmental officials offer a fresh look at the roots and the manifestations of this movement. Van Deburg contextualizes each of the essays, providing the reader with in-depth historical background.

how many white people in the world: How Uk Should Be James Nicholls, 2020-12-10 This is a book which holds a very large amount of my ideological beliefs, which form a new ideology quite unlike any other before it. I dream of a better world, a healthier world. A world where people are safe and all products which poison the minds and lead to human destruction don't exist. A world where animal species are never driven to extinction and co-exist with people rather well, where many natural areas of the world remain untouched, unpolluted and humans are safe from the natural hazards of the world and the unnatural hazards of the world. An economic system which is fair and relatively stable and where jobs are as easy to get as merely talking. A world where every religion is at peace with the other, as are its followers to followers of another. A justice system which is real justice and countries whom many people can say their honestly proud of being a citizen of. A world free of economic corruption and instability. Grasslands as green as the deepest green and forests which have trees not seldom seen. A world where everyone can claim free speech, no matter how outrageous, radical, stupid or barbaric it may sound to those people with differing views. The name of this new ideological belief should be officially called Distributionism. This book mainly focuses on the United Kingdom and what's best for the United Kingdom, but it can be read comfortably by people who aren't UK citizens.

how many white people in the world: Media Messages Linda Holtzman, Leon Sharpe, 2014-12-18 The new edition of this widely adopted book reveals how the popular media contribute to widespread myths and misunderstanding about cultural diversity. While focused on the impact of television, feature film, and popular music, the authors reach far beyond media to explore how our understanding, values, and beliefs about race, class, gender and sexual orientation are constructed. They analyze how personal histories, combined with the collective history of oppression and liberation, contribute to stereotypes and misinformation, as well as how personal engagement with media can impact prospects for individual and social freedom. Along with updated media examples, expanded theories and analysis, this edition explores even more deeply the coverage of race in two chapters, discusses more broadly how men and boys are depicted in the media and socialized, and how class issues have become even more visible since the Great Recession of the 21st century and the Occupy movements. Special activities and exercises are provided in the book and an online Instructor's Manual is available to adopters.

how many white people in the world: Whitewashing the Movies David C Oh, 2021-10-15 Whitewashing the Movies addresses the popular practice of excluding Asian actors from playing Asian characters in film. Media activists and critics have denounced contemporary decisions to cast White actors to play Asians and Asian Americans in movies such as *Ghost in the Shell* and *Aloha*. The purpose of this book is to apply the concept of "whitewashing" in stories that privilege White identities at the expense of Asian/American stories and characters. To understand whitewashing across various contexts, the book analyzes films produced in Hollywood, Asian American independent production, and US-China co-productions. Through the analysis, the book examines the ways in which whitewashing matters in the project of Whiteness and White racial hegemony. The book contributes to contemporary understanding of mediated representations of race by theorizing whitewashing, contributing to studies of Whiteness in media studies, and producing a counter-imagination of Asian/American representation in Asian-centered stories.

how many white people in the world: What's Really Going On? Ronnie Chiles, 2011-11-23

This book reflects poor black America's human condition and cruel reality historically in this country. Most poor people and people of color see enough of life's dark side to know for sure what's really going on. All of the social double standards and blatant contradictions that continue to define the democratic process for most of America's poor and forgotten people of color, still finds the American Dream to be a figment of their imaginations. This book is meant to show how American History is merely his story. The powers that be continue to impose their will on much smaller nations decade after decade in the name of freedom and democracy. Yet, nothing about our might makes right, preemptive strike mentalities has changed most poor Americans lifestyles. If anything it has merely reduced the level of comfort and security most people in this country live in daily, by heightening our nation's risk of being attacked. So the fear factor continues to control what really goes on in this country from decade to decade. This is why our nation will never be a genuine United States of America.

how many white people in the world: *Hearings, Reports and Prints of the Senate Committee on Government Operations* United States. Congress. Senate. Committee on Government Operations, 1969

how many white people in the world: When the World was Black Part Two Supreme understanding, 2013-02-02 When the World Was Black: The Untold History of the World's First Civilizations (Volume Two of The Science of Self series) has been published in TWO parts. Why two? Because there are far too many stories that remain untold. We had over 200,000 years of Black history to tell - from the southern tip of Chile to the northernmost isles of Europe - and you can't do that justice in a 300-page book. So there are two parts, each consisting of 360 pages of groundbreaking history, digging deep into the story of all the world's original people. Part One covers the Black origins of all the world's oldest cultures and societies, spanning more than 200,000 years of human history. Part Two tells the stories of the Black men and women who introduced urban civilization to the world over the last 20,000 years, up to the time of European contact. Each part has over 100 helpful maps, graphs, and photos, an 8-page full-color insert in the center, and over 300 footnotes and references for further research. "In this book, you'll learn about the history of Black people. I don't mean the history you learned in school, which most likely began with slavery and ended with the Civil Rights Movement. I'm talking about Black history BEFORE that. Long before that. In this book, we'll cover over 200,000 years of Black history. For many of us, that sounds strange. We can't even imagine what the Black past was like before the slave trade, much less imagine that such a history goes back 200,000 years or more." "Part Two covers history from 20,000 years ago to the point of European contact. This is the time that prehistoric cultures grew into ancient urban civilizations, a transition known to historians as the "Neolithic Revolution."

how many white people in the world: The RoutledgeFalmer Reader in Multicultural Education David Gillborn, Gloria Ladson-Billings, 2004 Bringing together scholarship from both sides of the Atlantic, this book focuses on the questions that shape the field of multicultural education, offering the reader an opportunity to achieve a real grasp of the subject.

how many white people in the world: Racism in Novels Elaine Rocha, 2010-04-16 During the first half of the twentieth century, both countries witnessed the advance of capitalism, translated into an aggressive police of development, with the exploitation of minerals, construction of railways and roads, urbanization and industrialization. Along with the economic development, Brazilian and South African society tried to take control of their society, meaning to control the population in order to maintain the status quo. For that end, racial definitions, classifications, theories and policies were fundamental. As the features of South African politics and policies of racial segregation emerged with new colors for the world after the end of the Apartheid regime, given the testimonies, the released documents and the new analysis, Brazilians have been pushed to face the problem of racial exclusion, unmasking its image as a "racial paradise" under the lights of new studies as well. Elaine Rocha uses novels published in both countries between 1912 and 1953 as a window from where one could see how cultural perceptions, policies and of racial differentiation were reflected in

the everyday life. The analysis of the literary content, plus the authors' biographies, political ideologies and the problems they were facing and interacting, together with their intentions of affecting the lives of the readers with the tragedy they illustrated in their novels claiming for a change in the real world.
