Opera coaching remains a mystery to many musicians. While an opera coach (or répétiteur) is principally tasked with ensuring singers sing the right notes and words, the coach's purview extends well beyond pitches and pronunciation. The opera coach must have a full understanding of human physiognomy and the human voice, as well as a knowledge of the many languages used in Western vocal music and over four centuries of opera repertoire – all to recognize what must happen for success when a singer steps on stage. NEW to this second edition: New and updated chapters throughout, featuring new discussions on large ensembles, twenty-first-century demands, and more. Deeper investigation of the styles of and problems posed by particular operas. Revised chapter structure that allows for an expanded and progressive emphasis on technical work. Modern singers have bemoaned the scarcity of good vocal coaches and conductors – those who understand voices and repertoire alike. *Opera Coaching: Professional Techniques for the Répétiteur*, Second Edition, demystifies the role of the opera coach, outlining the obstacles facing both the opera singer and the coach who seeks to realize the performer's full potential.
