of divine warning jane anna gordon: Of Divine Warning Jane Anna Gordon, Lewis R. Gordon, 2015-11-17 This book offers a theory of disaster in modern and contemporary society and its impact on the construction of social and political life. The theory is premised upon what the authors call the sign continuum, where disaster spreads across society through efforts to evade social responsibility for its causes and consequences. Phenomena generated by such efforts include the social manifestation of monstrosity (disastrous people and other forms of living things) and an emerging antipolitics in an effort to assert rule and order. A crucial development is the attack on speech, a fundamental feature of political life, as manifested by the increased expectations of

categories of people whose containment calls for shunning and silence.

Was haben der Tod George Floyds, Black Lives Matter-Proteste und Pandemien wie Covid-19 gemeinsam? Es ist das kollektive, existenzielle Ringen um Atem und es sind die tief darunterliegenden Strukturen globaler Ungerechtigkeit und Diskriminierung, die es auf radikale Weise sichtbar macht. In seinem neuen Buch geht der Philosoph Lewis R. Gordon der historischen Entwicklung Anti-Schwarzen Rassismus nach, untersucht seine neoliberalen und neokonservativen Ausformungen und legt die Übermacht weißer Perspektiven offen, die diese aufrechterhalten. Ich wurde nicht mit einem schwarzen Bewusstsein geboren. Ich bezweifle sehr, dass das auf irgendwen zutrifft, schreibt Gordon. Indem er autobiographische Kindheitserinnerungen in Jamaica und der Bronx mit popkulturellen Analysen aus Musik und Film verbindet, führt Gordon vor Augen, was es bedeutet, als schwarz angesehen zu werden – von anderen und von sich selbst. of divine warning jane anna gordon: Freedom, Justice, and Decolonization Lewis Gordon, 2020-12-30 The eminent scholar Lewis R. Gordon offers a probing meditation on freedom, justice, and decolonization. What is there to be understood and done when it is evident that the search for justice, which dominates social and political philosophy of the North, is an insufficient approach for the achievements of dignity, freedom, liberation, and revolution? Gordon takes the reader on a journey as he interrogates a trail from colonized philosophy to re-imagining liberation and revolution to critical challenges raised by Afropessimism, theodicy, and looming catastrophe. He offers not forecast and foreclosure but instead an urgent call for dignifying and urgent acts of political commitment. Such movements take the form of examining what philosophy means in African philosophy, liberation in decolonial thought, and the decolonization of justice and normative life. Gordon issues a critique of the obstacles to cultivating emancipatory politics, challenging reductionist forms of thought that proffer harm and suffering as conditions of political appearance and the valorization of nonhuman being. He asserts instead emancipatory considerations for occluded forms of life and the irreplaceability of existence in the face of catastrophe and ruin, and he concludes, through a discussion with the Circassian philosopher and decolonial theorist, Madina Tlostanova, with the project of shifting the geography of reason.

Contributors advance two claims: first, this story is the product of creolization—the intentional conglomeration of a variety of scientific, mythological, political, religious, gender, educational, historical, and racial discourses. Second, they trace the ways in which Frankenstein has creolized itself into modern and contemporary life and culture in such a way as to have become a

new mythology and political statement for each generation. of divine warning jane anna gordon: The Politics of Identity Michelle Harris, Martin Nakata, Bronwyn Carlson, 2013-01-01 The issue of Indigenous identity has gained more attention in recent years from social science scholars, yet much of the discussions still centre on the politics of belonging or not belonging. While these recent discussions in part speak to the complicated and contested nature of Indigeneity, both those who claim Indigenous identity and those who write about it seem to fall into a paradox of acknowledging its complexity on the one hand, while on the other hand reifying notions of 'tradition' and 'authentic cultural expression' as core features of an Indigenous identity. Since identity theorists generally agree that who we understand ourselves to be is as much a function of the time and place in which we live as it is about who we and others say we are, this scholarship does not progress our knowledge on the contemporary characteristics of Indigenous identity formations. The range of international scholars in this volume have begun an approach to the contemporary identity issues from very different perspectives, although collectively they all push the boundaries of the scholarship that relate to identities of Indigenous people in various contexts from around the world. Their essays provide at times provocative insights as the authors write about their own experiences and as they seek to answer the hard questions: Are emergent identities newly constructed identities that emerge as a function of historical moments, places, and social forces? If so, what is it that helps to forge these identities and what helps them to retain markers of Indigeneity? And what are some of the challenges (both from outside and within groups) that Indigenous individuals face as they negotiate the line between 'authentic' cultural expression and emergent identities? Is there anything to be learned from the ways in which these identities are performed throughout the world among Indigenous groups? Indeed why do we assume claims to multiple racial or ethnic identities limits one's Indigenous identity? The question at the heart of our enquiry about the emerging Indigenous identities is when is it the right time to say me, us, we... them?

of divine warning jane anna gordon: The Time of Catastrophe Christopher Dole, Robert Hayashi, Andrew Poe, Austin Sarat, 2016-03-09 If catastrophes are, by definition, exceptional events

of such magnitude that worlds and lives are dramatically overturned, the question of timing would pose a seemingly straightforward, if not redundant question. *The Time of Catastrophe* demonstrates the analytic productiveness of this question, arguing that there is much to be gained by interrogating the temporal conceits of conventional understandings of catastrophe and the catastrophic. Bringing together a distinguished, interdisciplinary group of scholars, the book develops a critical language for examining 'catastrophic time', recognizing the central importance of, and offering a set of frameworks for, examining the alluring and elusive qualities of catastrophe. Framed around the ideas of Agamben, Kant and Benjamin, and drawing on philosophy, history, law, political science, anthropology and the arts, this volume seeks to demonstrate how the question of 'catastrophic time' is in fact a question about something much more than the frequency of disasters in our so-called 'Age of Catastrophe'.

Nelson, 2020-10-01 *Daoism and Environmental Philosophy* explores ethics and the philosophy of nature in the *Daodejing*, the *Zhuangzi*, and related texts to elucidate their potential significance in our contemporary environmental crisis. This book traces early Daoist depictions of practices of embodied emptying and forgetting and communicative strategies of undoing the fixations of words, things, and the embodied self. These are aspects of an ethics of embracing plainness and simplicity, nourishing the asymmetrically differentiated yet shared elemental body of life of the myriad things, and being responsively attuned in encountering and responding to things. These critical and transformative dimensions of early Daoism provide exemplary models and insights for cultivating a more expansive ecological ethos, environmental culture of nature, and progressive political ecology. This work will be of interest to students and scholars interested in philosophy, environmental ethics and philosophy, religious studies, and intellectual history.

of divine warning jane anna gordon: *Levinas, Adorno, and the Ethics of the Material Other* Eric S. Nelson, 2020-12-01 This book sets up a dialogue between Emmanuel Levinas and Theodor W. Adorno, using their thought to address contemporary environmental and social-political situations. Eric S. Nelson explores the non-identity thinking of Adorno and the ethics of the Other of Levinas with regard to three areas of concern: the ethical position of nature and inhuman material others such as environments and animals; the bonds and tensions between ethics and religion and the formation of the self through the dynamic of violence and liberation expressed in religious discourses; and the problematic uses and limitations of liberal and republican discourses of equality, liberty, tolerance, and their presupposition of the private individual self and autonomous subject. Thinking with and beyond Levinas and Adorno, this work examines the possibility of an anarchic hospitality and solidarity between material others and sensuous embodied life.

of divine warning jane anna gordon: *Anticolonial Eruptions* Geo Maher, 2022-03-29 This incisive study reveals the fundamental, paradoxical weakness of colonialism and the enduring power of anticolonial resistance. Resistance is everywhere, but everywhere a surprise, especially when the agents of struggle are the colonized, the enslaved, the wretched of the earth. Anticolonial revolts

and slave rebellions have often been described by those in power as “eruptions”—volcanic shocks to a system that does not, cannot, see them coming. In *Anticolonial Eruptions*, Geo Maher diagnoses a paradoxical weakness built right into the foundations of white supremacist power, a colonial blind spot that grows as domination seems more complete. *Anticolonial Eruptions* argues that the colonizer’s weakness is rooted in dehumanization. When the oppressed and excluded rise up in explosive rebellion, with the very human demands for life and liberation, the powerful are ill-prepared. This colonial blind spot is, ironically, self-imposed: the more oppressive and expansive the colonial power, the lesser-than-human the colonized are believed to be, the greater the opportunity for resistance. Maher calls this paradox the cunning of decolonization, an unwitting reversal of the balance of power between the oppressor and the oppressed. Where colonial power asserts itself as unshakable, total, and perpetual, a blind spot provides strategic cover for revolutionary possibility; where race or gender make the colonized invisible, they organize, unseen. *Anticolonial Eruptions* shows that this fundamental weakness of colonialism is not a bug, but a permanent feature of the system, providing grounds for optimism in a contemporary moment roiled by global struggles for liberation.

of divine warning jane anna gordon: *Reconsidering Social Identification* Abdul R. JanMohamed, 2020-11-29 This volume investigates how four socially constructed identities (race, gender, class and caste) can be rethought as matrices designed to accumulate various kinds of socio-economic values and to translate and transfer these values from one group to another. Essays in the anthology also attempt to compare the mechanisms deployed by various groups to consolidate identificatory investments. Drawn mainly for the fields of literary and cultural studies, the essays are grouped in four categories. Essays collected under ‘Theoretical Approaches’ scrutinize the relative value of various approaches; those collected under ‘Considerations of Race, Gender, and Sexual Orientation’ examine the interaction between these three categories in formation of identities; those grouped under ‘Comparative Analysis of African-American and Dalit Writing’ provide comparative analyses of the literary productions of these two oppressed groups; and, finally, those under ‘The Persistence of Racialized Perceptions’ focus on the role of ideologically inflected perception of European colonizers and the persistence of such perception in the categorization and treatment of colonial migrants to the metropolis.

of divine warning jane anna gordon: *Black Utopia* Alex Zamalin, 2019-08-20 Within the history of African American struggle against racist oppression that often verges on dystopia, a hidden tradition has depicted a transfigured world. Daring to speculate on a future beyond white supremacy, black utopian artists and thinkers offer powerful visions of ways of being that are built on radical concepts of justice and freedom. They imagine a new black citizen who would inhabit a world that soars above all existing notions of the possible. In *Black Utopia*, Alex Zamalin offers a groundbreaking examination of African American visions of social transformation and their counterutopian counterparts. Considering figures associated with racial separatism, postracialism, anticolonialism, Pan-Africanism, and Afrofuturism, he argues that the black utopian tradition continues to challenge American political thought and culture. *Black Utopia* spans black nationalist visions of an ideal Africa, the fiction of W. E. B. Du Bois, and Sun Ra’s cosmic mythology of alien abduction. Zamalin casts Samuel R. Delany and Octavia E. Butler as political theorists and reflects on the antiutopian challenges of George S. Schuyler and Richard Wright. Their thought proves that utopianism, rather than being politically immature or dangerous, can invigorate political imagination. Both an inspiring intellectual history and a critique of present power relations, this book suggests that, with democracy under siege across the globe, the black utopian tradition may be our best hope for combating injustice.

of divine warning jane anna gordon: *Philosophy's Moods: The Affective Grounds of Thinking* Hagi Kenaan, Ilit Ferber, 2011-08-13 *Philosophy's Moods* is a collection of original essays interrogating the inseparable bond between mood and philosophical thinking. What is the relationship between mood and thinking in philosophy? In what sense are we always already philosophizing from within a mood? What kinds of mood are central for shaping the space of

philosophy? What is the philosophical imprint of Aristotle's wonder, Kant's melancholy, Kierkegaard's anxiety or Nietzsche's shamelessness? *Philosophy's Moods* invites its readers to explore the above questions through diverse methodological perspectives. The collection includes twenty-one contributions by internationally renowned scholars as well as younger and emerging voices. In pondering the place of the subjective and personal roots that thinking is typically called to overcome, the book challenges and articulates an alternative to a predominant tendency in philosophy to view the theoretical content and the affective side of thought as opposed to one another.

of divine warning jane anna gordon: *The History of Continental Philosophy* Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard, from Hegel to Heidegger, continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century. Although much has been written about these monumental thinkers, students and scholars lack a definitive guide to the entire scope of the continental tradition. The most comprehensive reference work to date, this eight-volume *History of Continental Philosophy* will both encapsulate the subject and reorient our understanding of it. Beginning with an overview of Kant's philosophy and its initial reception, the *History* traces the evolution of continental philosophy through major figures as well as movements such as existentialism, phenomenology, hermeneutics, and poststructuralism. The final volume outlines the current state of the field, bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism, globalization, and the environment. Throughout, the volumes examine important philosophical figures and developments in their historical, political, and cultural contexts. The first reference of its kind, *A History of Continental Philosophy* has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers, texts, and movements in rigorous yet jargon-free essays suitable for both undergraduates and seasoned specialists. These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy, surveying the distinctive, sometimes overlapping characteristics and approaches of each tradition. Featuring helpful overviews of major topics and plotting road maps to their underlying contexts, *A History of Continental Philosophy* is destined to be the resource of first and last resort for students and scholars alike.

Hoppe, Tracey Nicholls, 2010-03-08 *Fanon and the Decolonization of Philosophy* explores the range of ways in which Frantz Fanon's decolonization theory can reveal new answers to perennial philosophical questions and new paths to social justice. The aim is to show not just that Fanon's thought remains philosophically relevant, but that it is relevant to an even wider range of philosophical issues than has previously been realized. The essays in this book are written by both renowned Fanon scholars and new scholars who are emerging as experts in aspects of Fanonian thought as diverse as humanistic psychiatry, the colonial roots of racial violence and marginalization, and decolonizing possibilities in law, academia, and tourism. In addition to examining philosophical concerns that arise from political decolonization movements, many of the essays turn to the discipline of philosophy itself and take up the challenge of suggesting ways that philosophy might liberate itself from colonial-and colonizing-assumptions. This collection will be useful to those interested in political theory, feminist theory, existentialism, phenomenology, Africana studies, and Caribbean philosophy. Its Fanon-inspired vision of social justice is endorsed in the foreword by his daughter, Mireille Fanon-Mendès France, a noted human rights defender in the French-speaking world.

of divine warning jane anna gordon: *The Routledge Companion to the Philosophy of Race* Paul Taylor, Linda Alcoff, Luvell Anderson, 2017-11-28 For many decades, race and racism have been common areas of study in departments of sociology, history, political science, English, and anthropology. Much more recently, as the historical concept of race and racial categories have faced significant scientific and political challenges, philosophers have become more interested in these areas. This changing understanding of the ontology of race has invited inquiry from researchers in moral philosophy, metaphysics, epistemology, philosophy of science, philosophy of language, and

aesthetics. The Routledge Companion to Philosophy of Race offers in one comprehensive volume newly written articles on race from the world's leading analytic and continental philosophers. It is, however, accessible to a readership beyond philosophy as well, providing a cohesive reference for a wide student and academic readership. The Companion synthesizes current philosophical understandings of race, providing 37 chapters on the history of philosophy and race as well as how race might be investigated in the usual frameworks of contemporary philosophy. The volume concludes with a section on philosophical approaches to some topics with broad interest outside of philosophy, like colonialism, affirmative action, eugenics, immigration, race and disability, and post-racialism. By clearly explaining and carefully organizing the leading current philosophical thinking on race, this timely collection will help define the subject and bring renewed understanding of race to students and researchers in the humanities, social science, and sciences.

Giroux, Brad Evans, 2015-06-22 This is a must-read book for anyone ready to transcend fear and imagine a new reality.--Tikkun Disposable Futures makes the case that we have not just become desensitized to violence, but rather, that we are being taught to desire it. From movies and other commercial entertainment to extreme weather and acts of terror, authors Brad Evans and Henry Giroux examine how a contemporary politics of spectacle--and disposability--curates what is seen and what is not, what is represented and what is ignored, and ultimately, whose lives matter and whose do not. Disposable Futures explores the connections between a range of contemporary phenomena: mass surveillance, the militarization of police, the impact of violence in film and video games, increasing disparities in wealth, and representations of ISIS and the ongoing terror wars. Throughout, Evans and Giroux champion the significance of public education, social movements and ideas that rebel against the status quo in order render violence intolerable. Disposable Futures poses, and answers, the pressing question of our times: How is it that in this post-Fascist, post-Cold War era of peace and prosperity we are saddled with more war, violence, inequality and poverty than ever? The neoliberal era, Evans and Giroux brilliantly reveal, is defined by violence, by drone strikes, 'smart' bombs, militarized police, Black lives taken, prison expansion, corporatized education, surveillance, the raw violence of racism, patriarchy, starvation and want. The authors show how the neoliberal regime normalizes violence, renders its victims disposable, commodifies the spectacle of relentless violence and sells it to us as entertainment, and tries to contain cultures of resistance. If you're not afraid of the truth in these dark times, then read this book. It is a beacon of light.--Robin D. G. Kelley, author of Freedom Dreams: The Black Radical Imagination Disposable Futures confronts a key conundrum of our times: How is it that, given the capacity and abundance of resources to address the critical needs of all, so many are having their futures radically discounted while the privileged few dramatically increase their wealth and power? Brad Evans and Henry Giroux have written a trenchant analysis of the logic of late capitalism that has rendered it normal to dispose of any who do not service the powerful. A searing indictment of the socio-technics of destruction and the decisions of their deployability. Anyone concerned with trying to comprehend these driving dynamics of our time would be well served by taking up this compelling book.--David Theo Goldberg, author of The Threat of Race: Reflections on Racial Neoliberalism Disposable Futures is an utterly spellbinding analysis of violence in the later 20th and early 21st centuries. It strikes me as a new breed of street-smart intellectualism moving through broad ranging theoretical influences of Adorno, Arendt, Bauman, Deleuze, Foucault, Zizek, Marcuse, and Reich. I especially appreciated a number of things, including: the discussion of representation and how it functions within a broader logics of power; the descriptions and analyses of violence mediating the social field and fracturing it through paralyzing fear and anxiety; the colonization of bodies and pleasures; and the nuanced discussion of how state violence, surveillance, and disposability connect. Big ideas explained using a fresh straightforward voice.--Adrian Parr, author of The Wrath of Capital: Neoliberalism and Climate Change Politics
