Focusing on the aesthetics, the language, and the performativity of Hip Hop, this book pays attention to the life stance, the philosophy, and the spiritual beliefs of Australian Indigenous Hip Hop artists as 'glocal' producers and consumers. With Hip Hop as its main point of analysis, the author investigates, interrogates, and challenges categories and preconceived ideas about the critical notions of authenticity, 'Indigenous' and dominant values, spiritual practices, and political activism. Maintaining the emphasis on the importance of adopting decolonizing research strategies, the author utilises qualitative and ethnographic methods of data collection, such as semi-structured interviews, informal conversations, participant observation, and fieldwork notes. Collaborators and participants shed light on some of the dynamics underlying their musical decisions and their view within discussions on representations of 'Indigenous identity and politics'. Looking at the Indigenous rappers' local and global aspirations, this study shows that, by counteracting hegemonic narratives through their unique stories, Indigenous rappers have utilised Hip Hop as an expressive means to empower themselves and their audiences, entertain, and revive their Elders' culture in ways that are contextual to the society they live in.

i still call australia home sheet music: *Modern Moves* Danielle Robinson, 2015-06-26 *Modern Moves* traces the movement of American social dance styles between black and white

cultural groups and between immigrant and migrant communities during the early twentieth century. Its central focus is New York City, where the confluence of two key demographic streams - an influx of immigrants from Eastern Europe and the growth of the city's African American community particularly as it centered Harlem - created the conditions of possibility for hybrid dance forms like blues, ragtime, ballroom, and jazz dancing. Author Danielle Robinson illustrates how each of these forms came about as the result of the co-mingling of dance traditions from different cultural and racial backgrounds in the same urban social spaces. The results of these cross-cultural collisions in New York City, as she argues, were far greater than passing dance trends; they in fact laid the foundation for the twentieth century's social dancing practices throughout the United States. By looking at dance as social practice across conventional genre and race lines, this book demonstrates that modern social dancing, like Western modernity itself, was dependent on the cultural production and labor of African diasporic peoples -- even as they were excluded from its rewards. A cornerstone in Robinson's argument is the changing role of the dance instructor, which was transformed from the proprietor of a small-scale, local dance school at the end of the nineteenth century to a member of a distinct, self-identified social industry at the beginning of the twentieth. Whereas dance studies has been slow to connect early twentieth century dancing with period racial politics, *Modern Moves* departs radically from prior scholarship on the topic, and in so doing, revises social and African American dance history of this period. Recognizing the rac(ial)ist beginnings of contemporary American social dancing, it offers a window into the ways that dancing throughout the twentieth century has provided a key means through which diverse groups of people have navigated shifting socio-political relations through their bodily movement. *Modern Moves* asserts that the social practice of modern dancing, with its perceived black origins, empowered displaced people such as migrants and immigrants to grapple with the effects of industrialization, urbanization, and the rise of North American modernity. Far more than simple appropriation, the selling and practicing of black dances during the 1910s and 1920s reinforced whiteness as the ideal racial status in America through embodied and rhetorical engagements with period black stereotypes.
