By embedding lessons within stories that use metaphorical language, this collection helps individuals internalize knowledge, making it memorable and applicable.

Why Metaphors Matter for Teachers and Trainers

Teaching and training demand the translation of knowledge into digestible formats. Metaphors serve as cognitive shortcuts, enabling learners to grasp unfamiliar ideas through familiar frames of reference. For example, describing the brain as a "computer" allows learners to understand neural processing in terms of hardware and software. The magic of metaphor 77 stories for teachers trainers thinkers 77 stories for teachers trainers and thinkers leverages this by offering diverse stories that model such metaphorical thinking.

the magic of metaphor 77 stories for teachers trainers thinkers 77 stories for teachers trainers and thinkers: The Design Manager's Handbook John Eynon, CIOB (The Chartered Institute of Building), 2013-01-23 Design management as a recognised role in the built environment industry is relatively new, initially arising from the need for better co-ordination and delivery of design information from design teams to main contractors - particularly important as procurement routes involving contractor led design have become much more commonplace. The advent of design packages driven by specialist sub-contractors has also increased the need for co-ordination and management of the design process. With the growing complexity of construction projects, effective design management is increasingly central to project success. BIM, as it gains acceptance across the industry will undoubtedly have a huge impact on project delivery process and the role of the Design Manager. The CIOB Design Manager's Handbook covers subjects such as design process and management tools, the role of the Design Manager, value management and innovation, procurement routes and implications, people dynamics, and factors that will affect the development of the Design Manager's role in the future, including BIM. It will ensure Design Managers understand the processes, tools and skills that are required to be successful in the role, and will assist them in delivering real value to complex construction projects. Written for both the Design Manager practitioner and students on construction related degree courses, anyone interested in construction based design management will also find the book useful.

the magic of metaphor 77 stories for teachers trainers thinkers 77 stories for teachers trainers and thinkers: Implementing Sustainability in the Curriculum of Universities Walter Leal Filho, 2017-11-17 This book presents sustainable development themes across universities and introduces methodological approaches and projects to the teaching staff. It has been prepared against this background, to identify ways to better teach about sustainability issues in a university context. It contains a set of papers presented at a Symposium with the same title, held at Manchester Metropolitan University (UK) in March 2017. The event was attended by a number of institutions of higher education active in this field. It involved researchers in the field of sustainable development in the widest sense, from business and economics, to arts and fashion, administration, environment, languages and media studies. Sustainability is seldom systematically embedded in the curriculum at higher education institutions. Yet, proper provisions for curricular integration of sustainability issues as part of teaching programmes across universities are an important element towards curriculum greening. The aims of this book are: (i) to provide teaching staff at universities active and/or interested in teaching sustainable development themes with an opportunity to document and disseminate their works (i.e. curriculum innovation, empirical work, activities, case studies practical projects); (ii) to promote information, ideas and experiences acquired in the execution of teaching courses, especially successful initiatives and good practice; (iii) to introduce methodological approaches and projects which aim to offer a better understanding of how matters related to sustainable development can be tackled in university teaching. Last but not least, a further aim of this book, prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), is to catalyse a debate on the need to promote sustainable development teaching today.
