Chronological Organization and Thematic Units

The textbook breaks down history into manageable chapters that focus on specific time periods or themes, such as the rise of empires, cultural exchanges along trade routes, or the impact of revolutions. Each chapter starts with an overview that sets the stage, followed by detailed narratives, primary source excerpts, and engaging sidebars that add depth to the main text.

glencoe world history textbook: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

glencoe world history textbook: The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that there is no record of any important Jewish contribution to the sciences? (World Civilizations, Thomson Wadsworth). Or that Christianity was started by a young Palestinian named Jesus? (The World, Scott Foresman/Pearson). Supplemental materials and other classroom influences are even worse. The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel. The problems uncovered in this ground-breaking analysis are instructive, and illustrate the need for reform in the way textbooks are developed, written, marketed, and distributed. Substitute another area-how we teach American history, Western civilization, or comparative religion-and we have another, equally intriguing case study. The Trouble with Textbooks shows what can go terribly wrong in discussing religion, geography, culture, or history-and in this case-all of them. The Trouble with Textbooks tells a cautionary tale for all readers, whatever their background, of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life, instead disparage some groups and teach historical distortions. With millions of young people using these textbooks each year, the denigration of some should be a concern for all.

glencoe world history textbook: Whitewashing War Christopher Leahey, 2015-04-24 Whitewashing War explores perhaps the most critical issue social studies educators presently face:

How do we teach our students about war? In this timely book, Christopher Leahey investigates how the political struggles over the social studies curriculum, the corporate domination of the textbook and testing industry, and the curricular constraints of the No Child Left Behind Act combine to stifle historical inquiry and deprive students of meaningful social studies instruction. Using the controversial Vietnam War as a case study, Leahey holds textbook narratives up to the light, illuminating how the adoption process, interpretive framework, and selection of evidence combine to transform the past into thinly veiled historical myths. By attending to questions traditionally ignored in history education, this dynamic book: Challenges educators to rethink their pedagogical approaches to military conflict, American and otherwise. Calls on teachers to develop students' critical sensibilities to ask questions, conduct research, evaluate evidence, and make meaning of the past. Provides classroom lessons for history educators and students to engage in rich, intellectual encounters with the historical record. Christopher R. Leahey teaches world history in upstate New York. His articles have appeared in *Social Education* and *The Social Studies*. "If students are to be prepared for the challenges of the 21st century, then we need to provide inspired, interdisciplinary instruction that can provide the skills, values and knowledge to enable our future citizens with the possibility, promise, and perspective to transform their world. Whitewashing War provides that solid interdisciplinary framework for teachers and students to teach and learn about the myth of war." —Critical Education "Leahey echoes a concern expressed by others that history textbooks fail to address the realities of war." —CHOICE "The crowning achievement of Whitewashing War is that it clearly illustrates the necessity of pursuing rational answers about why things are as they are (or were as they were). It becomes clear upon reading this book that, if we help our students pursue rational answers in the course of creating personally meaningful understandings of the world, they will figure out just what it is that needs to be done." —From the Foreword by E. Wayne Ross, University of British Columbia "The author has done a masterful job of exploring issues of historiography, pedagogy, textbook debates, and critical thinking. Through a deep examination of two historical turning points in the Vietnam War, he has contrasted the known facts of these periods with the accounts contained in the textbooks." —Rick Ayers, Graduate School of Education, UC Berkeley "A passionate and powerful analysis. Christopher Leahey provides penetrating insight into how Americans teach about their wars. As such, his book is an invaluable aid to understanding the past and its connection to our current predicament." —Fredrik Logevall, Cornell University "Whitewashing War challenges the fundamental assumptions underlying the corporate regime of standards, textbooks, and testing and exposes the distortions, manipulation, and lies that result. Leahey builds a compelling case for critical inquiry and dialogue. Highly recommended!" —Ronald W. Evans, San Diego State University, author of *The Social Studies Wars*

glencoe world history textbook: Controversy in the Classroom Diana E. Hess, 2009-05-26
In a conservative educational climate that is dominated by policies like No Child Left Behind, one of the most serious effects has been for educators to worry about the politics of what they are teaching and how they are teaching it. As a result, many dedicated teachers choose to avoid controversial issues altogether in preference for safe knowledge and safe teaching practices. Diana Hess interrupts this dangerous trend by providing readers a spirited and detailed argument for why curricula and teaching based on controversial issues are truly crucial at this time. Through rich empirical research from real classrooms throughout the nation, she demonstrates why schools have the potential to be particularly powerful sites for democratic education and why this form of education must include sustained attention to authentic and controversial political issues that animate political communities. The purposeful inclusion of controversial issues in the school curriculum, when done wisely and well, can communicate by example the essence of what makes communities democratic while simultaneously building the skills and dispositions that young people will need to live in and improve such communities.

glencoe world history textbook: Muslims and Islam in U.S. Education Liz Jackson, 2014-04-03 Winner of Philosophy of Education Society of Australasia (PESA)'s inaugural PESA Book Awards in 2015, and The University of Hong Kong Research Output Prize for Education 2014-15.

Muslims and Islam in U.S. Education explores the complex interface that exists between U.S. school curriculum, teaching practice about religion in public schools, societal and teacher attitudes toward Islam and Muslims, and multiculturalism as a framework for meeting the needs of minority group students. It presents multiculturalism as a concept that needs to be rethought and reformulated in the interest of creating a more democratic, inclusive, and informed society. Islam is an under-considered religion in American education, due in part to the fact that Muslims represent a very small minority of the population today (less than 1%). However, this group faces a crucial challenge of representation in United States society as a whole, as well as in its schools. Muslims in the United States are impacted by ignorance that news and opinion polls have demonstrated is widespread among the public in the last few decades. U.S. citizens who do not have a balanced, fair and accurate view of Islam can make a variety of decisions in the voting booth, in job hiring, and within their small-scale but important personal networks and spheres of influence, that make a very negative impact on Muslims in the United States. This book presents new information that has implications for curricula, religious education, and multicultural education today, examining the unique case of Islam in U.S. education over the last 20 years. Chapters include: Perspectives on Multicultural Education 9/11, the Media, and the New Need to Know Islam and Muslims in Public Schools Blazing a Path for Intercultural Education This book is an essential resource for professors, researchers, and teachers of social studies, particularly those involved with multicultural issues, critical and sociocultural analysis of education and schools; as well as interdisciplinary scholars and students in anthropology and education.

glencoe world history textbook: *The Language Police* Diane Ravitch, 2007-12-18 If you're an actress or a coed just trying to do a man-size job, a yes-man who turns a deaf ear to some sob sister, an heiress aboard her yacht, or a bookworm enjoying a boy's night out, Diane Ravitch's internationally acclaimed *The Language Police* has bad news for you: Erase those words from your vocabulary! Textbook publishers and state education agencies have sought to root out racist, sexist, and elitist language in classroom and library materials. But according to Diane Ravitch, a leading historian of education, what began with the best of intentions has veered toward bizarre extremes. At a time when we celebrate and encourage diversity, young readers are fed bowdlerized texts, devoid of the references that give these works their meaning and vitality. With forceful arguments and sensible solutions for rescuing American education from the pressure groups that have made classrooms bland and uninspiring, *The Language Police* offers a powerful corrective to a cultural scandal.

glencoe world history textbook: *Censorship of Historical Thought* Antoon De Baets, 2001-12-30 History is an important, dangerous, and fragile subject. Historical thought can be censored in widely diverging political and historiographical contexts, as historians are well aware. Yet the problems of censorship, often thought to be obvious, are rarely studied. Filling a significant void, this guide supplies information on the censorship of historical thought and the fate of persecuted historians in over 130 countries from Afghanistan to Zimbabwe and from 1945 to 2000. With each entry providing a chronological overview of cases and giving a full listing of sources, the book is the first systematic effort to overview the repression of historical thought. Aiming to encompass all countries in which censorship and persecution have taken place, De Baets sketches a world map of repression that goes beyond the well-known and well-studied cases. It assembles scattered data from three types of sources: the works of censors and censored, historical and biographical dictionaries and historiographical surveys, and reports from international human rights organizations. Showing the universality of historical censorship and its infinite variety in amount and degree, the book also provides a basis for further comparative research.

glencoe world history textbook: *Instructional Design for Teachers* Alison A. Carr-Chellman, 2015-06-26 *Instructional Design for Teachers, Second Edition* focuses on the instructional design (ID) process specifically for K-12 teachers. The first edition introduced a new, common-sense model of instructional design to take K-12 teachers through the ID process step by step, with a special emphasis on preparing, motivating, and encouraging new and ongoing use of ID principles. This

second edition includes new material on design in gaming, cybercharters, online classrooms, and flipped classrooms, as well as special considerations for the Common Core. Each chapter contains framing questions, common errors, easy-to-use rules of thumb, clearly stated outcomes, and examples showing ID in action. The basic model and its application within constructivism and user-design will help teachers adapt from a behavioral approach to a more open, student-centered design approach. Combining basics with strategies to implement this model in the most advanced instructional approaches, this book empowers teachers and learners to use good instructional design with the most recent research-based approaches to learning. *Instructional Design for Teachers* shows how ID principles can impact instructional moments in positive and practical ways. The book can be used for basic ID courses and introductory curriculum courses, and is accessible to in-service as well as pre-service teachers.

glencoe world history textbook: *Civility, Religious Pluralism and Education* Vincent Biondo, Andrew Fiala, 2013-12-17 This book focuses on the problem of religious diversity, civil dialogue, and religion education in public schools, exploring the ways in which atheists, secularists, fundamentalists, and mainstream religionists come together in the public sphere, examining how civil discourse about religion fit within the ideals of the American political and pedagogical systems and how religious studies education can help to foster civility and toleration.

glencoe world history textbook: *The Patchwork of World History in Texas High Schools* Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas, a populous and nationally influential state, over the last hundred years. Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century, with each new framework patched over but never completely erased or replaced, the author crucially examines themes of imperialism, Eurocentrism, and nationalism in both textbooks and the curriculum more broadly. The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents, while the second focuses on the depiction of non-Western peoples, and persistent narratives of Eurocentrism and nationalism. It ultimately offers that a more global, accurate, and balanced curriculum is possible, despite the tension between the ideas of professional world historians, who often de-center the nation-state in their quest for a truly global approach to the subject, and the historical core rationale of state-sponsored education in the United States: to produce loyal citizens. Offering a new, conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times, it provides essential context for scholars and educators with interests in the history of education, curriculum studies, and the teaching of World History in the United States.

glencoe world history textbook: *The 'Other' Students* Dina C. Maramba, Rick Bonus, 2012-12-01 Though the Filipino American population has increased numerically in many areas of the United States, especially since the influx of professional immigrants in the wake of the 1965 Immigration Act, their impact on schools and related educational institutions has rarely been documented and examined. *The Other Students: Filipino Americans, Education, and Power* is the first book of its kind to focus specifically on Filipino Americans in education. Through a collection of historical and contemporary perspectives, we fill a profound gap in the scholarship as we analyze the emerging presence of Filipino Americans both as subjects and objects of study in education research and practice. We highlight the argument that one cannot adequately and appropriately understand the complex histories, cultures, and contemporary conditions faced by Filipino Americans in education unless one grapples with the specificities of their colonial pasts and presents, their unique migration and immigration patterns, their differing racialization and processes of identity formations, the connections between diaspora and community belonging, and the various perspectives offered by ethnic group-centered analysis to multicultural projects. The historical, methodological, and theoretical approaches in this anthology will be of interest to scholars, researchers, and students in disciplines which include Education, Ethnic Studies, Asian American and Pacific Islander Studies, Anthropology, Sociology, Political Science, Urban Studies,

Public Policy, and Public Health.

glencoe world history textbook: World Yearbook of Education 2011 Lyn Yates, Madeleine Grumet, 2011-02 This book brings together contributions from around the world that analyse and reflect on the way curriculum is configuring and reconfiguring that world.

glencoe world history textbook: What Shall We Tell the Children? Stuart J. Foster, Keith A. Crawford, 2006-04-01 The pages of this book illustrate that as instruments of socialization and sites of ideological discourse textbooks are powerful artefacts in introducing young people to a specific historical, cultural and socioeconomic order. Crucially, exploring the social construction of school textbooks and the messages they impart provides an important context from within which to critically investigate the dynamics underlying the cultural politics of education and the social movements that form it and which are formed by it. The school curriculum is essentially the knowledge system of a society incorporating its values and its dominant ideology. The curriculum is not "our knowledge" born of a broad hegemonic consensus, rather it is a battleground in which cultural authority and the right to define what is labelled legitimate knowledge is fought over. As each chapter in this book illustrates curriculum as theory and practice has never been, and can never be, divorced from the ethical, economic, political, and cultural conflicts of society which impact so deeply upon it. We cannot escape the clear implication that questions about what knowledge is of most worth and about how it should be organized and taught are problematic, contentious and very serious.

glencoe world history textbook: Understanding History Ros Ashby, Professor Peter Gordon, Peter Lee, 2004-08-02 What sense do children and young people make of history? How do they cope with competing historical accounts in textbooks? How do they think historical or archaeological claims are supported or rejected? And whatever students think about history, how do their teachers see history education? The contributors to this fourth volume of the International Review of History Education discuss these questions in the context of their research. Divided into two sections, the first part of the book examines students' ideas about the discipline of history and the knowledge it produces. The second part looks in detail at teachers' own ideas about teaching. Featuring contributions from authors throughout the world, including the USA, Canada, Portugal, Brazil, Taiwan and the UK, the book provides interesting studies of how history is both taught and received in these different countries. Understanding History contributes to current knowledge of successful teaching: that teachers must take into accounts students' preconceptions that they bring to the classroom as well as accepting the complexity and importance of their own professional knowledge. The book will be of interest to anyone studying or researching history education as well as teachers of history throughout the world.
