Sparling, 2014-06-06 Scientific evidence accumulated over decades validates the idea that a plant-based dietary pattern, such as the traditional Mediterranean way of eating, promotes health and plays an important role in risk reduction and prevention of several chronic diseases. One of the great advantages of the Mediterranean diet is that it can be easily adopted by other cultures because it is flexible and highly palatable. The Mediterranean Way of Eating: Evidence for Chronic Disease Prevention and Weight Management offers evidence-based information about an enjoyable, healthy way of eating that has stood the test of time, along with practical suggestions for incorporating the Mediterranean diet into your daily life. The first part of the book provides a brief history of the Mediterranean region and its different dietary influences. It discusses shared and unique foods in the coastal regions, and recent influences of processed foods and fast foods. It also presents scientific information on critical nutrients (macronutrients, vitamins, minerals, phytochemicals, antioxidants, and fiber) in foods found in the Mediterranean diets, how they function in the body, and why they are essential to health. The authors review the major chronic diseases, including obesity, type 2 diabetes, cardiovascular diseases, and certain cancers, and examine how a Mediterranean-style diet may help reduce risk or prevent these diseases. The second part of the book addresses the protective effects of foods and food components, discussing how Mediterranean diets may confer health benefits for reducing disease risk and managing weight. It examines the evidence-based health benefits for each of the food groups—such as fruits, vegetables, grains, fish, meat, dairy products, plus alcohol—along with suggestions for using the foods as part of a healthy diet. The last part of the book focuses on how to move toward a Mediterranean-style diet in your own life, eating at home or dining out, offering effective strategies for implementing the dietary changes.

lorenza de medici cooking school: Faith, Food, and Friendship Walter J. Smith, S.J., 2022-09-27 Life—like any good recipe—requires time, wholesome ingredients, patience, and skill to perfect. It's not every day that a Jesuit priest psychologist who apprenticed in cooking at Le Cordon Bleu in Paris in the 1960s and spent nearly 60 years preaching, teaching, and managing academic

and non-profit organizations sets aside time to preserve memories of the significant people, moments, travels, and events that have shaped his life. Even more impressive is Father Walter J. Smith's epic undertaking of presenting a creative collection of enchanting reminiscences through the lens of the foods and recipes he sampled in his extensive travels. *Faith, Food, and Friendship* chronicles highlights of Father Smith's life's pilgrimage by means of 175 carefully crafted classic, original, or adapted recipes assembled from many corners of the globe and every level of society. "Growing up in South Boston in a second-generation American Irish family that ate but never dined, it is remarkable that I developed any interest at all in the culinary arts. Looking back on my own lifetime of discovery, I can affirm that God did not skimp on the good stuff. There has been plenty of butter and heavy cream, truffles and saffron, aceto balsamico and jamón ibérico de Bellota. I invite you to accompany me on this journey, where these words from the author of the Book of Genesis will, it is hoped, prove true: 'Everything that lives and moves about will be food for you.'" Early in his life, Fr. Smith came under the spiritual and intellectual influence of the Society of Jesus (the Jesuits) who launched him on a rich journey of discovery. He has a doctorate in clinical psychology and degrees in philosophy, theology, French language and literature, and counseling psychology. He spent five decades as a clinician, professor, consultant, trustee, department chair, dean, chief executive officer, and chancellor.

lorenza de medici cooking school: The Renaissance Perfected D. Medina Lasansky, 2004 Mussolini's bold claims upon the monuments and rhetoric of ancient Rome have been the subject of a number of recent books. D. Medina Lasansky shows us a much less familiar side of the cultural politics of Italian Fascism, tracing its wide-ranging efforts to adapt the nation's medieval and Renaissance heritage to satisfy the regime's programs of national regeneration. Anyone acquainted with the beauties of Tuscany will be surprised to learn that architects, planners, and administrators working within Fascist programs fabricated much of what today's tourists admire as authentic. Public squares, town halls, palaces, gardens, and civic rituals (including the famed Palio of Siena) were all "restored" to suit a vision of the past shaped by Fascist notions of virile power, social order, and national achievement in the arts. Ultimately, Lasansky forces readers to question long-standing assumptions about the Renaissance even as she expands the parameters of what constitutes Fascist culture. The arguments in *The Renaissance Perfected* are based in fresh archival evidence and a rich collection of illustrations, many reproduced for the first time, ranging from photographs and architectural drawings to tourist posters and film stills. Lasansky's groundbreaking book will be essential reading for students of medieval, Renaissance, and twentieth-century Italy as well as all those concerned with visual culture, architectural preservation, heritage studies, and tourism studies.
