Crash Course Economics Episode 1 Worksheet Answer Key Explained

To help you navigate the worksheet questions, here's an overview of typical answers along with explanations that clarify the economic reasoning.

Question 1: What is the fundamental economic problem?

****Answer:**** Scarcity.

****Explanation:**** The fundamental economic problem is scarcity, which means that resources are limited while human wants are unlimited. This mismatch forces individuals and societies to make choices about how to allocate resources efficiently.

Question 2: Provide an example of opportunity cost from your own life.

****Answer:**** Answers will vary, but an example could be: Choosing to spend time studying for an exam instead of going out with friends. The opportunity cost is the enjoyment and social interaction missed by studying.

****Explanation:**** Opportunity cost is the value of the next best alternative that you give up when making a decision. It emphasizes that every choice involves trade-offs.

Question 3: How do incentives influence economic decisions?

****Answer:**** Incentives motivate individuals and organizations to behave in certain ways, such as working harder when there is a bonus or saving money when interest rates are high.

****Explanation:**** Incentives are crucial in economics because they shape behavior by either encouraging or discouraging certain actions.

Question 4: Why do economists say “there is no such thing as a free lunch”? Explain.

****Answer:**** Because even if something appears free, there is always a cost involved somewhere, either in resources, time, or opportunity cost.

****Explanation:**** This phrase highlights that resources are scarce, so producing or consuming anything involves trade-offs.
