Comprehensive Coverage of Human Body Systems

A well-rounded essentials of human anatomy and physiology ebook covers all major systems, including:

- The skeletal system – bones and joints that provide structure and support
- The muscular system – muscles that facilitate movement
- The nervous system – brain, spinal cord, and nerves controlling bodily functions
- The cardiovascular system – heart and blood vessels transporting nutrients
- The respiratory system – lungs and airways for gas exchange
- The digestive system – organs processing food and nutrients
- The endocrine system – glands regulating hormones
- The urinary system – kidneys and bladder managing waste
